

We are pleased to announce higher leverage on MT5!

Effective from	Maximum leverage
1 October 2026	Up to 1:2000

Increased leverage

We are increasing maximum leverage across selected instrument groups, giving you more flexibility during normal trading conditions.

Instrument group	Previous	New
Spot Gold	1:500	1:2000
FX Majors	1:1000	1:2000
Energy	1:100	1:500
FX Crosses	1:500	1:1000
FX Exotics	1:200	1:500
Spot Metals	1:500	1:1000
INDEX_2	1:200	1:300
Crypto Main	1:200	1:500
Crypto Others	1:75	1:100

How the new structure works

The new leverage model is exposure-based. Your applicable leverage depends on the total nominal exposure of your positions. As exposure moves into higher tiers, the applicable leverage decreases progressively.

01	Normal Trading Period Standard leverage tiers apply, including the increased maximum leverage on selected groups.
02	HMR Period Higher Margin Requirement may apply during periods of increased market risk, including important news, the approach of non-trading periods such as the end of the trading day or weekends, public holidays, and other predefined higher-risk periods.
03	During HMR Higher margin requirements apply to new trades opened during the HMR Period. Existing open positions are not recalculated when HMR starts.
04	When HMR ends Positions opened during HMR are recalculated and the standard leverage applicable after the HMR Period is applied.

What this means for your trading

Higher maximum leverage	Exposure-based control	Risk-sensitive HMR
Selected instruments now offer materially higher maximum leverage during normal trading conditions.	Leverage scales with total nominal exposure rather than remaining fixed at one level.	Higher margin requirements can be applied during predefined higher-risk periods.

Detailed leverage tiers

Energy	Normal Trading Period	HMR Period
	0 – 100K: 1:500	0 – 100K: 1:100
	100K – 500K: 1:200	100K – 1M: 1:50
